01 Executive Summary

This report analyzes the organic search performance of **Ayurvedic Healthcare Client**, a multi-location Ayurvedic healthcare brand operating across Bangalore, Mangalore, Hubli, and Mumbai. The analysis covers **3 months of Google Search Console data** (Feb 8 — May 7, 2026).

The website generates significant brand-driven traffic but shows **critically low CTR (1.11%)** and a weak average position of **7.8**, indicating strong impressions with poor click-through conversion. The homepage alone dominates 77% of all clicks, revealing an **over-reliance on branded queries** and insufficient non-branded, service-level page optimization.

Mobile traffic accounts for **70.5% of all clicks** yet Desktop has a higher CTR (1.53% vs 1.0%), suggesting mobile UX and speed improvements are critical. Multiple **URL structure issues** (HTTP vs HTTPS, www vs non-www) and **duplicate content paths** were identified as priority technical fixes.

02

Keyword & Query Analysis

⚠ **Critical Finding — Brand Dependency**

Over 85% of clicks come from branded queries ("client-website", "pranavaidya", "prana vaidya"). This means the site has almost zero non-branded organic visibility. Any reputation issue or brand name change would collapse organic traffic overnight.

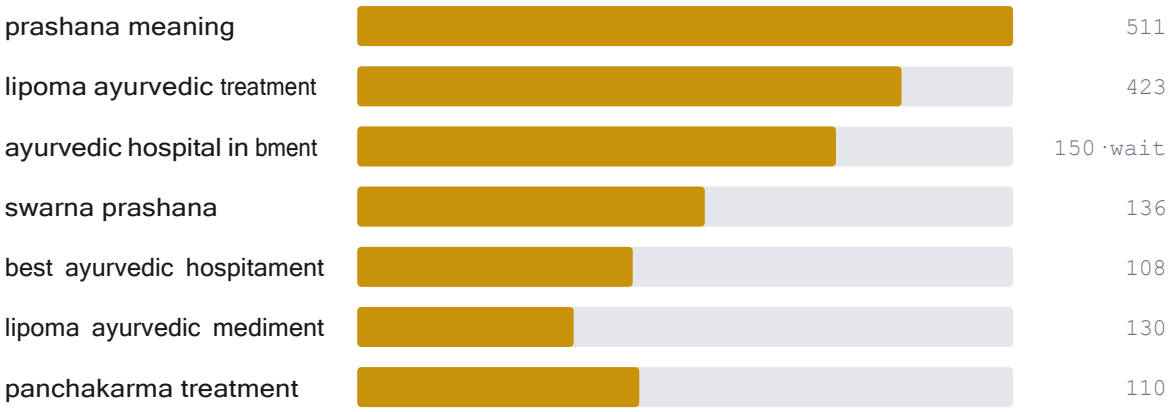
Top Performing Queries (by Clicks)

#	QUERY	CLICKS	IMPRESSIONS	CTR	POSITION	TYPE
1	client-website	46	437	10.53%	1.0	Brand
2	pranavaidya	23	243	9.47%	1.0	Brand
3	prana vaidya	16	328	4.88%	1.2	Brand
4	client-website - hospital	14	172	8.14%	1.0	Brand
5	praana vaidya	11	143	7.69%	1.6	Brand
6	prana ayurveda	8	139	5.76%	6.5	Non-Brand

#	QUERY	CLICKS	IMPRESSIONS	CTR	POSITION	TYPE
7	prana ayurveda bangalore	6	64	9.38%	2.9	Local
8	Lead Ayurvedic Doctor	6	57	10.53%	5.0	Brand
9	ayurvedic hospital bangalore	3	254	1.18%	8.9	Opportunity
10	ayurvedic hospital near me	1	159	0.63%	7.4	Opportunity

High-Impression, Zero-Click Keyword Opportunities

These keywords show Google is surfacing the site, but no clicks are happening — a strong signal for CTR and ranking optimization.



03 Page Performance Analysis

⚠ Critical Finding — URL Canonicalization Issue

The homepage appears under 3 separate URLs: `https://client-website.com/` (326 clicks), `http://client-website.com/` (84 clicks), and `https://www.client-website.com/` (24 clicks). This splits PageRank and confuses Google. A canonical tag and 301 redirects must be implemented immediately.

Top Pages by Clicks

#	PAGE URL	CLICKS	IMPRESSIONS	CTR	POSITION	STATUS
1	/ (Homepage — https)	326	15,924	2.05%	8.3	Canonical Issue
2	/ (Homepage — http)	84	9,685	0.87%	4.9	Redirect Needed
3	/ (Homepage — www)	24	3,780	0.63%	13.5	Redirect Needed
4	/cont	21	5,063	0.41%	4.8	Low CTR

#	PAGE URL	CLICKS	IMPRESSIONS	CTR	POSITION	STATUS
	act-us/					
5	/about-us/	9	2,622	0.34%	5.5	Low CTR
6	/best-ayurvedic-doctors-in-bangalore/	8	1,893	0.42%	7.0	Optimize Meta
7	/boost-child-immunity-with-swarna-prashana/	7	3,816	0.18%	4.0	Critical CTR
8	/panchakarma-myths-and-facts/	7	1,770	0.40%	4.4	Low CTR
9	/ayurvedic-treatmen	6	1,238	0.48%	7.7	Optimize

#	PAGE URL	CLICKS	IMPRESSIONS	CTR	POSITION	STATUS
	ts/lipoma/					
10	/sharadi-virechana-seasonal-detox-ayurveda/	5	2,871	0.17%	3.9	Critical CTR

💡 **Biggest Opportunity — Swarna Prashana Blog Page**

The page `/boost-child-immunity-with-swarna-prashana/` appears in position 4.0 with 3,816 impressions but only 7 clicks (0.18% CTR). At position 4, this page *should* be getting 7-10% CTR. A compelling title tag rewrite alone could unlock 200-300+ additional clicks per quarter from this single page.

04 Device & Geographic Performance

05

Technical SEO Findings

URL Canonicalization

Homepage indexed under HTTP, HTTPS, and www versions simultaneously. Splits PageRank

Duplicate Content Paths

Multiple URL patterns for same content: /treatments/lipoma/, /

Mobile CTR Underperformance

Mobile CTR is 53% lower than desktop. Likely cause: slow LCP, poor mobile meta snippets, or CLS issues

across 3 URLs. 301 redirects + canonical tags required.

ayurvedic-treatments/ lipoma/, /our-services/lipomas/ — all competing for same keywords.

disrupting user experience.

🗂️

Internal Linking Gaps

Service pages like /our-services/thyroid-problems/, /pcod-pcos-treatment/, and /joint-pain-treatment/ have 0 clicks despite being crawlable. Likely orphaned pages.

🎯

Meta Description CTR Failures

Pages ranked position 3–5 with CTR under 0.5% (industry avg 10%+) strongly indicate weak or auto-generated meta descriptions failing to drive clicks.

🌐

Translated Results Mismatch

GSC shows translated result appearances (2 clicks, 1,743 impressions) but 0.11% CTR. Hindi/Marathi/Kannada audience is not being captured effectively.

✅

Strong Brand SERP Dominance

All branded queries rank position 1.0–1.6 with CTRs of 7–10%. Brand SERP is clean and well-controlled.

✅

Multi-Location Presence

Site ranks for Bangalore, Mangalore, Hubli, and Mumbai-specific queries, indicating good GBP and local SEO foundation.

✅

Structured Blog Content

Blog posts on Panchakarma, Swarna Prashana, Lipoma, and Virechana are generating impressions. Content strategy is directionally correct.

Issue Priority Matrix

PRIORITY	ISSUE	PAGES AFFECTED	IMPACT	EFFORT
🔴 HIGH	HTTP → HTTPS redirect + canonical	Homepage (3 variants)	PageRank consolidation	Low (1-2hrs)
🔴 HIGH	Rewrite meta titles & descriptions	10+ service/ blog pages	+CTR 200-400%	Medium (1-2 days)
🔴 HIGH	Merge duplicate lipoma/ treatment URLs	/lipoma/, /lipomas/, /ayurvedic-treatments/lipoma/	Ranking consolidation	Medium
🟡 MED	Fix orphaned service pages	Thyroid, PCOS, joint pain pages	Indexing + CTR	Medium
🟡 MED	Mobile page speed optimization	All pages	Mobile CTR uplift	High (dev work)
🟡 MED	Schema markup for doctors & services	Doctor profile pages	Rich snippets	Medium
🟢 LOW	Regional language content (Hindi/ Kannada)	Blog section	Translated traffic	High (content)
🟢 LOW	FAQ schema for informational pages	Panchakarma, Lipoma blogs	Featured snippet chance	Low
